	🔶 Patient	
	Type 1 Diabetes	
	Type 1 diabeters is the type of diabeters that typically develops in children and in young adults. In type 1 diabetes the body stope marking insulin and the blood stager (glucow) level grees very high. Treatment to control the blood glucow level or is in insulin injections and adardly dd. Childre redunctias fail no condica the nisk of complications. They include reducing blood pressure if it is high and advice to lead a healthy illestyle.	
	What is type 1 dobted? Dobtes methylic (and caled dobtes from row or) occurs when the level of super (gluczee) in the Moot become higher than romat. There are two main types of diabetes. These are alled type 1 diabetes and type 2 dobtes. Type 1 dobtes and type 6 dowloging in this frame are young add its in the UK adout 1 in 300 people dowloging With type 11 dobtes the third was usually dowloging up in glucioly, over day are weeden. The praces size	
	making insulin. It is treads with insulin logicious and a healthy dist (see thebay). Why goods the parcosast dop matting insulin? In mack cases, type 1 delates is its hapf to be an autoimmour desses. Their autoimmour dessen normally makes antibodies to acting ones call de logician de logician de logician de logician de logician de logician antibodies in the logician call and logician per logician de logician de logician de logician de logician antibodies in the logician de log	
	What are the symptoms of type 1 diabetes? The symptoms that unally occur when you Find device type 1 diabetes are: • You are very hirsh at all of the time. • You pans a rist of units. • Thrankoms, weight loca and beling generally unwell.	
	The above symptions tend to develop quite quickly, over a few days or weeks. After treatment is stated, the symptoms soon self and gp. However, without Itsathent , the tood sugar (glucose) have becomes very high and adds from in the diodoxie mit (blacobics). This previses to yan theoremelosity in initial in the body (dehydrated) and re likely to tape into a corns and de. (The reason you make a lot of urine and become threy is because glucose loss in royour currer, which privat out even the through the kitelyne).	
	How is type 1 disbates diagnosed? A langite disclisation that makes tages (glucone) in a sample of urine. This may suggest the diagnosis of diabetes. How wer, he only way to confirm the diagnosis is to have a blood test to book at the lavel of glucose in your blood.	
	Is type 1 diabetes inherited? Whoophings in diabetes in net an inherited disease, there is some genetic factor. A first dag en istaline (shift, brittle, son, stagling) of anomous with type 1 diabetes has about a 1 in 10 chance of the equip type to the stage of the because cratter pays are note provide to device of the stage of the stage of the stage of the stage of the the stage of the stage of the the stage of the stage of
